

Investment focus

The fund's aim is to achieve capital growth in the long term. The Fund invests worldwide in companies active in the biotechnology sector. Experienced sector specialists focus on profitable mid and large cap companies with an established product portfolio. Stock selection is based on fundamental analysis, in particular of the medical indications addressed, the means of efficacy and the market potential. A global network of experts spanning scientific and industrial fields supports the Management Team in forming opinions and making investment decisions. The selection of portfolio companies is entirely bottom-up, independent of benchmark weightings. The Fund takes ESG factors into consideration while implementing the aforementioned investment objectives.

Rolling 12-month-performance

Source: Bellevue Asset Management, 31.08.2021; all figures in EUR %, total return / BVI-methodology
Past performance is not a reliable indicator of future results and can be misleading. As the Sub-fund is denominated in a currency that may differ than an investor's base currency, changes in the rate of exchange may have an adverse effect on prices and incomes. Performance is shown net of fees and expenses for the relevant share class over the reference period. All performance figures reflect the reinvestment of dividends and do not take into account the commissions and costs incurred on the issue and redemption of shares, if any. Individual costs are not taken into account and would have a negative impact on the performance. With an investment amount of EUR 1,000 over an investment period of five years, the investment result in the first year would be reduced by the front-end load of up to EUR 50 (5%) as well as by additional individual custody charges. In subsequent years, the investment result would also be reduced by the individual custody account costs incurred. The reference benchmark of this class is used for performance comparison purposes only (dividend reinvested). No benchmark is directly identical to a sub-fund, thus the performance of a benchmark is not a reliable indicator of future performance of the sub-fund it is compared to. There can be no assurance that a return will be achieved or that a substantial loss of capital will not be incurred.

Market review

Global stock markets marched higher in August. The S&P Index closed the month with a gain of 3.0%, the Nasdaq Biotech Index +4.2% and the BB Adamant Biotech (Lux) Fund +2.0% (USD / B shares).

The re-opening of the global economy continued in August. Many industrialized countries have eased their pandemic restrictions and this was reflected in the good economic data published in August. However, the rapid spread of the delta variant, which has caused new cases to climb, especially among unvaccinated people, is a cause for concern. Data from the UK and Israel suggest that vaccine effectiveness declines about six to eight months after vaccination. For this reason, some countries have begun to administer a booster dose to particularly vulnerable people. The US central bank said it could start to dial back its expansionary monetary policy sometime this year, but any such action would depend on a further improvement in employment data and the repercussions of the delta variant.

The following companies made the best contribution to the portfolio's performance in August: Early in the month Regeneron reported strong quarterly results, driven by the sales of its REGEN-CoV antibody cocktail for COVID-19 patients. The New York-based biotech company also benefited from good news about Dupixent and Eylea, two drugs that were developed in collaboration with business partners. Seagen added a second bladder cancer program to its pipeline by acquiring rights to a HER2 antibody drug conjugate (ADC) from RemeGen. Alnylam, a specialist in RNAi therapeutics, was marked up after publishing strong sales for its approved products Onpattro, Givlaari and Oxlumo, and it increased its sales guidance for the current fiscal year.

Immuno-oncology firm Beigene was a performance detractor. Its shares retreated in the wake of political action in China and the repercussions that had on the country's stock market. This political action also pressured the shares of two other companies in the portfolio, Innovent and Zai Labs. Jazz Pharmaceuticals plunged after releasing its quarterly results, which raised fears of generic competition gaining entry into the narcolepsy market. Fate Therapeutics presented good data for its B-cell lymphoma program, but could not beat investors' high expectations.

Our stance towards the biotech sector remains positive in view of its strong fundamentals and very attractive valuations (average 2022 P/E of 14x and PEG of 1.1 for large caps). These are still very attractive multiples compared to the biotech sector's historical valuations and the current ratios for the pharma sector (P/E 16x, PEG 2.4) and the S&P Index (P/E 21x, PEG 2.1).

Positioning & outlook

The companies in our portfolio are working on technologies or products for novel treatment solutions. We are also invested in selected specialty pharma companies that offer high growth rates and moderate valuations. The BB Adamant Biotech (Lux) Fund is well-positioned to profit from the milestones that are expected to be reached in 2021 and 2022. The regulatory environment favors the innovation coming out of biotech labs and the coronavirus crisis has improved the image of drug developers. Large pharma companies have acquired a number of companies in the fund's portfolio – Loxo, Array, Medicines Company, Myokardia and Alexion – and we expect more M&A deals to be announced during the coming months.

For illustrative purposes only. Holdings and allocations are subject to change. Any reference to a specific company or security does not constitute a recommendation to buy, sell, hold or directly invest in the company or securities. Where the Sub-Fund is denominated in a currency other than an investor's base currency, changes in the rate of exchange may have an adverse effect on price and income.

Risk and return profile

The Fund's investment objective is to generate attractive and competitive capital growth in the long term. It is therefore particularly suited to investors with an investment horizon of at least 5 years who want to selectively diversify their portfolio with investments in the biotechnology sector and who are willing to accept the equity risks typical of this sector.

low risk

high risk

This fund is assigned to this category, as its share price fluctuates very severely and both the risk of loss and the opportunities for profit can therefore be very high. The calculation of the risk and earnings profile is based on simulated/historical data, which cannot be used as a reliable indication of the future risk profile. The classification of the fund may change in future and does not constitute a guarantee. Even a fund classed in category 1 does not constitute a completely risk-free investment. There can be no guarantee that a return will be achieved or that a substantial loss of capital will not be incurred. The overall risk exposure may have a strong impact on any return achieved by the fund or subfund. For further information please refer to the fund prospectus or KIID.

Liquidity risk

The fund may invest some of its assets in financial instruments that may in certain circumstances reach a relatively low level of liquidity, which can have an impact on the fund's liquidity.

Risk arising from the user of derivatives

The fund may conclude derivatives transactions. This increases opportunities, but also involves an increased risk of loss.

Currency risks

The fund may invest in assets denominated in a foreign currency. Changes in the rate of exchange may have an adverse effect on prices and incomes.

Operational risks and custody risks

The fund is subject to risks due to operational or human errors, which can arise at the investment company, the custodian bank, a custodian or other third parties.

Target market

The fund is suitable for retail and professional investors in Austria, Germany, Luxembourg, Spain and Switzerland.

Chances

- New innovative drugs are powering sustainable momentum in the biotech sector.
- Attractively valued large cap biotechs.
- Expiring pharmaceutical patents trigger a rise in M&A activity.
- Focus on US biotech companies with strong growth potential.
- Bellevue - Healthcare pioneer since 1993 and today one of the biggest independent investors in the sector in Europe.

Inherent risks

- The fund invests in equities. Equities are subject to strong price fluctuations and so are also exposed to the risk of price losses.
- Biotech equities can be subject to sudden substantial price movements owing to market, sector or company factors.
- The fund invests in foreign currencies, which means a corresponding degree of currency risk against the reference currency.
- Investing in emerging markets entails the additional risk of political and social instability.
- The fund may invest a proportion of its assets in financial instruments that might under certain circumstances have a relatively low level of liquidity, which can in turn affect the fund's liquidity.

You can find a detailed presentation of the risks faced by this fund in the "Special Investment Risks" section of the sales prospectus.

Note: in certain cases the ESG rating methodology may lead to a systematic discrimination of companies or industries, the manager may have good reasons to invest in supposed "laggards". The CO2 intensity expresses MSCI ESG Research's estimate of GHG emissions measured in tons of CO2 per USD 1 million sales; for further information c.f. www.bellevue.ch/en/corporate-information/sustainability

Important information

This marketing communication relates to Bellevue Funds (Lux) (hereinafter the “Fund”), an investment company with variable capital “société à capital variable” (SICAV) under the current version of the Law of the Grand Duchy of Luxembourg of 10 August 1915 on commercial companies (“Law of 1915”) and is authorized under Part I of the Law of 17 December 2010 relating to undertakings for collective investment (“Law of 2010”) as an undertaking for collective investment (UCITS). BB Adamant Biotech is a subfund of Bellevue Funds (Lux).

This marketing communication is issued by Bellevue Asset Management AG, which is an authorized asset manager subject to the supervision of the Swiss Financial Market Supervisory Authority (FINMA) and acts as an Investment Manager of the Fund. The Prospectus, statutes, the annual and half-yearly report, the share prices and further information about the Fund can be obtained free of charge in English and German from the management company of the Fund, Bellevue Asset Management AG, Seestrasse 16, CH-8700 Küsnacht, from the representative, paying, facilities and information agents mentioned below or online at www.Bellevue.ch. The Key Investor Information documents are available free of charge in the languages of the countries of distribution at www.fundinfo.com.

This document is neither directed to, nor intended for distribution or use by, any person or entity who is a citizen or resident of any locality, state, country or jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. It is particularly not intended for US persons, as defined under Regulation S of the U.S. Securities Act of 1933, as amended. The information and data presented in this document are not to be considered as an offer to buy, sell or subscribe to any securities or financial instruments. The information, opinions and estimates contained in this document reflect a judgment at the original date of release and are subject to change without notice. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient and in particular tax treatment depends on individual circumstances and may be subject to change. This document is not to be relied upon in substitution for the exercise of independent judgment. Before making any investment decision, investors are recommended to ascertain if this investment is suitable for them in the light of their financial knowledge and experience, investment goals and financial situation, or to obtain specific advice from an industry professional. The details and opinions contained in this document are not to be considered as recommendation or investment advice. Every investment involves risk, especially with regard to fluctuations in value and return, and investors’ capital may be at risk. If the currency of a financial product is different from your reference currency, the return can increase or decrease as a result of currency fluctuations. Past performance is no indicator for the current or future performance. The performance data are calculated without taking account of commissions and costs that result from subscriptions and redemptions. Commissions and costs have a negative impact on performance. For more information about the associated costs, please refer to the related costs and fees section of the prospectus. Any benchmarks/indices cited herein are provided for information purposes only. No benchmark/index is directly comparable to the investment objectives, strategy or universe of the subfund. The performance of a benchmark shall not be indicative of past or future performance of the subfund. Financial transactions should only be undertaken after having carefully studied the current valid prospectus and are only valid on the basis of the latest version of the prospectus and available annual and half-yearly reports. Please take note of the risk factors.
